ERP Business Consultants

Robocoder Corporation is a global provider of easy-to-use and intuitive B2B applications and platforms, including Rintagi, an open-source low-code development platform that rejuvenates itself. Since 1999, Robocoder has been heavily investing in research and development to develop, customize, and maintain proven off-the-shelf and tailored enterprise database software solutions at a fraction of time and cost. To further demonstrate how flexible and fast we turn concepts into reality, we have taken on a challenge to deploy the world's first low code fully generated ERP systems.

We are looking for several energetic and enthusiastic **ERP Business Consultants** to join us remotely from major cities around the world. Working with our product design team, we need you to take charge in delivering the required software solutions with agility and integrity. Our competitive advantage is low maintenance so all recurring maintenance fee is profit and we would like to share that with you.

What we offer:

- Competitive remuneration and revenue sharing
- Work from home and/or your clients' offices
- Leaders who support your personal development
- Opportunity to be accountable and make a lasting impact

What you do:
- Scope and estimate reasonable project timeline and resources
- Communicate precise business and project objectives to developers
- Collaborate with the IT Infrastructure, Development & Leadership teams
- Perform gap analysis and requirements gathering
- Work closely with stakeholders to ensure their expectations are met and our commitments are delivered
- Compose checklists and self-serve training for stakeholders
- Iteratively critique and validate requirements with product team and users
- Ensure comprehensive test cases and scenarios
- Take total responsibility to deliver total solutions on concurrent projects

What you bring:
- Minimum 2 years of business consulting, business analysis and project management experience working with ERP software for mid-size clients, preferable Tier 2 space i.e. Acumatica, Sage 300 or Intacct, MS Dynamics, SAP B1, NetSuite or equivalent;
- Have demonstrable analytical and leadership skill
- Knowledgeable in SCRUM/SAFe/Kanban
- Experience in BA/QA/UI/UX, database knowledge and SQL writing skill would be an asset
- Highly organized, thorough, creative and confident
- University degree or equivalent
- Excellent interpersonal and communication skills
- Strong attention to detail with the ability to manage multiple tasks simultaneously
- Self-starter, achievement-oriented, motivated and proven problem-solving abilities

We thank all applications, but only selected interviews will be contacted. No phone calls or agencies please.
